01 · THE PHILOSOPHY

# Build a Business First, Then Earn the Product

*“Don’t build a product to start a business. Build a business first, then earn the product.”*

FusionSync AI builds and fulfills the AI systems behind other people’s businesses, chatbots, voice receptionists, CRM automation, workflow agents that agency owners and operators sell under their own name. We stay invisible. You keep the relationship, the client trust, and the brand.

This is not a one-off development shop, and it is not a SaaS product you subscribe to. It is a long-term technology partnership built around a simple sequencing idea: validate the demand first, build only what’s proven, and earn ownership as you scale — instead of investing in a product before you know if the market wants it.

**\$20k+**

02 · THE PROBLEM WE SOLVE

# You Already Have the Hardest Part

Agency owners and operators who come to us already have what's hardest to build: real client relationships, category knowledge, and trust in a specific vertical, dental, real estate, home services, creator monetization, or another niche they know deeply.

What they don't have is a reason to spend months and tens of thousands of dollars building a technical product before knowing whether it will convert. The traditional path forces that bet anyway: hire developers, manage a technical team, and invest heavily upfront — all before a single client has paid for it.

***The result: real contracts get turned down, or delivered with something cobbled together that undersells the relationship.***

FusionSync exists to remove that forced bet, not by being cheaper, but by changing the order in which the business gets built.

## The traditional path

- Hire developers or a dev shop before any client has said yes
- Spend months and significant capital validating nothing
- Carry the technical risk alone, with no fallback if it doesn't land

## The FusionSync path

- Validate first with a free proof-of-concept, pitched to real clients
- Pay for implementation only once a client is actually paying
- Scale support cost with revenue, not ahead of it

03 · WHAT FUSIONSYNC IS

# Two Ways to Work With Us

## Standalone Builds

For businesses that want a specific AI system built and delivered — fixed scope, fixed tiers, fixed timeline. You own what we build for you and pay implementation plus ongoing monthly support.

## Agency Partnership Model

For agency owners who want to resell a productized AI offer to their own client base, under their own brand, starting with a free proof-of-concept, scaling through per-client rollout, and earning outright ownership of the software as the client base grows.

*Both paths share the same underlying delivery capability. The partnership model simply adds a long-term growth and ownership structure on top.*

## Who this is for

- Agency owners with real paying clients or prospects ready to pitch in one vertical
- Businesses that need a specific capability delivered fast, without hiring developers
- Operators who know their market deeply but don't want to become a software company

## Who this isn't for

- Idea-stage founders with no clients or validated demand yet
- Cold-outreach pipelines with no real prospects ready to pitch

04 · WHAT WE INSTALL

# Twelve Fulfilment Capabilities

Every capability below maps to a fixed tier, a fixed timeline, and a fixed price, confirmed in a short scoping call, never guessed at.

<p><b>AI Chatbot</b> Answer, qualify, and capture leads on web, SMS, and WhatsApp. <b>Tier 1</b></p>	<p><b>AI Receptionist</b> 24/7 phone and voice intake with qualification and booking. <b>Tier 1–2</b></p>
<p><b>Appointment Booking &amp; Recovery</b> Book appointments and recover no-shows before pipeline leaks. <b>Tier 1–2</b></p>	<p><b>Instagram &amp; WhatsApp Inbound</b> Turn social DMs and WhatsApp messages into qualified CRM leads. <b>Tier 2</b></p>
<p><b>CRM Automation</b> Move data between systems so reps stop copy-pasting. <b>Tier 2</b></p>	<p><b>Database Reactivation</b> Wake dormant CRM contacts and recover pipeline already paid for. <b>Tier 2–3</b></p>
<p><b>AI Lead Nurturing</b> Keep warm leads alive until they book or opt out. <b>Tier 2</b></p>	<p><b>Cold Outbound Appointment Setting</b> Book qualified meetings from outbound lists, permission-based. <b>Tier 2–3</b></p>
<p><b>Lead-to-Quote Automation</b> Turn inquiries into quotes faster with less manual rep work. <b>Tier 2–3</b></p>	<p><b>Customer Support Automation</b> Deflect repeat tickets and route complex issues with context. <b>Tier 1–3</b></p>
<p><b>Workflow Automation</b> Connect apps and AI steps so ops work runs without manual handoffs. <b>Tier 2–3</b></p>	<p><b>AI Agents</b> Multi-step autonomous workflows across tools with approval gates. <b>Tier 3</b></p>

05 · HOW WE WORK

# From First Call to Live System

01

## Discovery & Scoping

We map your vertical, your client type, and the exact capability that fits — at no cost.

02

## Free Proof-of-Concept

A working demo built on the proven stack, ready to pitch immediately.

03

## Tiered Implementation

Fixed-price build, delivered in 3–15 days depending on complexity.

04

## Monthly Support

Ongoing maintenance with an included ticket allowance for every tier.

05

## Scale & Own

Partners scale per-client and earn ownership milestones over time.

**3 days**

Typical proof-of-concept turnaround

**3–15 days**

Full implementation window by tier

**24 hr**

Support response SLA

06 • PRICING AT A GLANCE

# Transparent Tiers, No Guesswork

We publish real numbers because agency owners and business operators deserve to know what something costs before they pick up the phone.

Tier	Implementation	Timeline	Use Cases	Monthly Support
<b>Tier 1 — Simple</b>	\$300 – \$400	3–7 days	AI chatbot, basic CRM, appointment booking	\$300/mo · 10 tickets
<b>Tier 2 — Mid</b>	\$500 – \$700	5–10 days	Chatbot + receptionist, CRM automation, booking + SMS	\$400/mo · 15 tickets
<b>Tier 3 — Complex</b>	\$800 – \$1,000	10–15 days	Full stack: chatbot, receptionist, CRM, support, workflows, agents	\$500/mo · 20 tickets

*Final quote is confirmed after a short discovery call. Out-of-scope work is billed at \$20/hr; custom integrations are quoted separately.*

07 · THE PARTNERSHIP MODEL

# You Bring the Clients. We Bring Technology.

Built for agency owners who already have real prospects ready to pitch, not cold-outreach pipelines. As your active client base grows, so does your right to own the software outright.

<p><b>25</b></p> <h3>Geography Ownership</h3> <p>Own the software for your geography, vertical, and tech-stack combination. We step back from that market.</p> <p><b>Transfer fee: \$5,000 (optional)</b></p>	<p><b>100</b></p> <h3>Global Ownership</h3> <p>Own the software globally for your vertical and stack — a battle-tested product with a proven client base.</p> <p><b>Transfer fee: \$15,000 (optional)</b></p>
---	---

*Ownership is optional at every milestone, you may stay on the recurring model indefinitely if you prefer.*

08 · PROOF OF WORK

# Same Pattern, Different Verticals

Real engagements where an operator brought demand and FusionSync fulfilled the technology layer. Names anonymized where needed.

<p><b>DENTAL · UK</b></p> <p><b>UK Dental Agency Partner</b></p> <p>CRM bridge and full tech fulfilment for a UK agency serving dental clinics, built on GHL + n8n.</p> <p><i>GHL · n8n · CRMBridge · Dentally</i></p>	<p><b>CREATOR · CANADA</b></p> <p><b>Creator Monetization Build</b></p> <p>Full software build and handover for an Instagram AI creator monetizing his audience.</p> <p><i>Next.js · Stripe · Auth · Handover</i></p>
<p><b>REAL ESTATE</b></p> <p><b>Underwriting Platform</b></p> <p>Custom software for real estate underwriting workflows, built around how underwriters actually work.</p> <p><i>Workflow · Documents · CRM</i></p>	<p><b>VERTICAL SAAS</b></p> <p><b>Vertical SaaS Fulfilment</b></p> <p>Production architecture, integrations, and ongoing build support for a defined niche product.</p> <p><i>SaaS · Integrations · Production</i></p>

09 · THE DELIVERY STACK

# What We Plug Into Your Clients' World

Real infrastructure behind every build — not a black box. Every capability in this brochure runs on some combination of the stack below, chosen for what each client's vertical actually needs, never a one-size-fits-all bundle.

<b>GoHighLevel</b>	<b>n8n</b>	<b>Make</b>	<b>Next.js</b>
<b>TypeScript</b>	<b>PostgreSQL</b>	<b>Prisma</b>	<b>Supabase</b>
<b>Stripe</b>	<b>OpenAI API</b>	<b>Claude API</b>	<b>LiveKit</b>
<b>Restack</b>	<b>Vercel</b>		

10 · WHO'S BEHIND IT

# Led by an Operator, Not a Sales Team

## Shubham Kashyap

Founder & Tech Partner, FusionSync AI

Top Rated Plus on Upwork, 35+ projects delivered across chatbots, voice AI, CRM automation, and white-label vertical software.

Shubham leads delivery personally on every partnership, there is no hand-off to an anonymous team.

## Why one operator, not a bench of account managers

Every partnership is scoped, built, and supported with direct founder involvement. No brief gets lost in translation between a salesperson and a delivery team, the person who scopes your system is the person who ships it.

11 · GET IN TOUCH

# Let's Talk About Your Vertical

Tell us your vertical, your client count, and the gap you're trying to fill today. We'll talk through fit before anything is scoped.
